Gokul Shrestha

Full Stack Developer (MERN)

clasherkailash123@gmail.com | +977 9861331462 | github.com/kailashshrestha3 | linkedin.com/in/GokulShrestha
Chitrapur, Bhaktapur, Nepal

Summary

Motivated Computer Application graduate (2026) with hands-on experience building full stack web applications using the MERN stack. Strong foundation in both frontend and backend development, REST API design, and database management. Eager to contribute to a team and grow as a professional developer.

Education

Bachelor in Computer Application (BCA) 2022 – 2026
Bhaktapur Multiple Campus, Tribhuvan University, Bhaktapur

Higher Secondary (+2), Science 2019 – 2021
Seabird International College, Bhaktapur GPA: 3.38

Technical Skills

Frontend	React.js, HTML5, CSS3, Tailwind CSS, Typescript, Nextjs
Backend	Node.js, Express.js, REST API Design
Databases	MongoDB, MySQL
Auth & Tools	JWT, bcrypt, Git, GitHub, Postman, VS Code
Deployment	Vercel, Render

Projects

Online Book Store

GitHub | Live Demo

- Built a full stack e-commerce platform with book browsing, search, and secure JWT-based user authentication protecting cart and order routes.
- Implemented full shopping cart functionality (add, update, remove items) and an order management system with order history per user.
- Designed and consumed RESTful APIs for books, users, cart, and orders with consistent error handling; deployed live on Render.
- **Technologies used:** React.js, Node.js, Express.js, MongoDB, JWT, bcrypt, Tailwind CSS, REST API, Render

Eventora - Event Booking Platform

GitHub | Live Demo

- Built a full stack event management and booking platform enabling users to discover, browse events, and make secure bookings with OTP-based email verification.
- Implemented comprehensive authentication system with JWT-based authorization, OTP email verification via Nodemailer, and role-based access control (user/admin).
- Designed RESTful API endpoints for event creation, booking management, payment status tracking, and cancellation with automatic seat restoration; integrated MongoDB for data persistence.
- Developed responsive React UI with React Router for multi-page navigation, Tailwind CSS styling, and Axios interceptors for automatic token attachment to protected API requests.
- **Technologies used:** React.js, Node.js, Express.js, MongoDB, JWT, Nodemailer, bcrypt, Tailwind CSS, Axios, REST API
